Elite Series Humidifiers
Residential Whole-House (GFI #5705 & 5710)

GeneralAire® Models 570M & 570A
Flow Through Humidifiers

Breathe Healthier **Control Indoor Humidity.**

Installing a GeneralAire® Whole House Humidifier can reduce allergy and asthma symptoms, minimize risk of infection, protect valuables (such as furniture, woodwork and musical instruments) and save you money.

How the 570 Works:

Your furnace sends warm air through the unit, evaporating water within. Moistened air is then delivered throughout your home via your home's duct system to keep your air healthy.

Details inside or go to: www.generalfilters.com/model570

Maintenance

Maintenance of your new GeneralAire® 570 Elite Series Flow Through Humidifier is minimal. To ensure peak performance and reliable operation, simply change your Vapor Pad® once per year! Go to www.generalfilters.com / support center / video library to view a video demonstrating how to change your Vapor Pad®. The 570 requires Vapor

Install A Humidifier In Your Home To:

Protect your family's health:

Low humidity is where viruses can thrive and cause your throat and nasal passages to dry. This leads to nose bleeds, increased risk of infection, colds, flu and other respiratory ailments. Dry air can trigger asthma and allergy symptoms. Air that's too dry causes dry/ itchy/cracked skin.

Protect your valuables:

Dry air in your home can cause expensive artwork, wood flooring, cabinets, furniture and musical instruments to crack. Dry air increases annoying static shocks that can damage electronics.

Save money:

Since dry air can cause woodwork to crack, resulting gaps in windows & doors let cold outside air in. In addition, dry air feels colder. Take the chill out with an 570. Turn your thermostat down and save money.

Why A Whole-House Unit?

- Treats Your Whole House 24 / 7 / 365
- Requires Minimal Maintenance
- Out of Site
- Quiet

- Learn more at www.generalfilters.com.

Replacement Vapor Pad®

- GFI #7900: GA10

(Replace At The Start Of Each Heating Season)

Winter Settings

During winter months, be sure the water supply is turned on, your damper control is set to "Open" or "Winter", and your humidistat is set somewhere between 40% and 60%.

How Much Humidity Do I Need?

Ideally, your home's humidity levels should stay between 40% and 60%. Outside that range, your risk of being adversely affected increases.
